

Now you know

RESOURCES THAT BUILD YOUR EYE IQ

With apologies to poker players everywhere – eyes are terrible at keeping secrets. They can't hide health problems from a comprehensive eye exam. Small, big or even life threatening – your eyes show signs of conditions you don't want to miss.

We make it easy to get an exam every year. That's why our widespread network has so many care options. And that's why you have access to tools, technology and the latest diagnostics to keep you well and explain it all.

FACT: People are 4 times more likely to get an eye exam than a physical.¹

THE LATEST TOOLS WITH THE LATEST WORD

Plug into a healthy wellness experience. Here's how: sign up to learn about a health issue with articles, fun quizzes and special offers in our e-newsletter. See what experts have to say about it on eyesiteonwellness.com, our award-winning personal health site. Then schedule an eye exam with a convenient eye doctor using the Provider Locator. And finally, set a reminder using the EyeMed member app on your iPhone or Android.

TECH TELLS YOUR WELLNESS STORY

Retinal imaging and corneal mapping are highly precise digital eye exam innovations. They can detect even the smallest shift in your eye health. The EyeMed network is full of doctors who specialize in this sophisticated technology.

FACT: The eye is the only area of the body with a clear view of blood vessels.² Symptoms of heart disease can show up here first.

AN EYE ON YOUR HEALTH: AWARENESS

SERIOUS HELP FOR SERIOUS CONDITIONS*

If you have diabetes, you may need ongoing eye care attention. You got it. Ask about the diabetes benefit option that lets you see your eye doctor more often to monitor this leading cause of blindness. You'll also get special reminders and access to the diagnostic eye tests you need.

GOOD EYE CARE STARTS EARLY

Some eye disorders show up in early childhood (think nearsightedness, farsightedness and lazy eye). This is a big deal when 80% of what kids learn is processed through their eyes.³ The size of our network means you can find an eye doctor your child is comfortable with. If your child needs specialized frames, we have coverage options for that, too.*

FACT: 25% of school-aged children have problems with their vision.⁴

Using your vision benefits more can help spot serious conditions like:⁵

- Cancer
- Diabetes
- Heart disease
- High blood pressure
- High cholesterol
- Neuromuscular diseases
- Rheumatic diseases
- Sickle cell anemia
