## **Additional HSA Preventive Drug List**

Effective January 1, 2019

Employers can elect to include an additional HSA Preventive Drug coverage feature with your prescription benefit plan. Below is the list of medications available under the additional HSA Preventive Drug coverage. This list includes preventive drugs that are available in addition to the NetResults or Source Rx Drug List. Check your Blue Cross benefit booklet to find out if the NetResults and SourceRx Additional HSA Preventive Drug List applies to your plan.

The actual cost of the medication will be applied toward the preventive benefit offered by your employer, allowing you to receive coverage even if you have not met your deductible. Benefits will be provided in accordance with U.S. Department of the Treasury and Internal Revenue Service (IRS) guidance with Health Spending Accounts (HSAs) and qualified High Deductible Health Plans (HDHPs). This list will be reviewed periodically and is subject to change.

The drugs listed below are grouped into broad categories. Each category includes an alphabetical list of drugs. Please verify with your plan if a generic drug must be tried before filling a brand version of a drug.

**Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in capital letters followed by the generic name. Generic medicines are available for many of the brand-name drugs listed though may not be available in all strengths.**
